- Internal guide rail with bike stand for secure parking
- Reinforced steel walls for added durability
- Secure 3-bolt locking system
- Weather- and corrosion-resistant

Description

The Bike Garage 1 for Bikes is a universal storage solution designed to provide a secure and safe space for bicycles. Constructed from 1.5 mm thick galvanised and painted steel, this bike box combines durability with a modern aesthetic, making it both functional and visually appealing in any setting. Its robust design effectively protects your bike from rain, sun, and potential theft, ensuring your equipment remains safe year-round.

Inside, an internal guide rail with a stand stabilizes the bike during storage, preventing tipping or scratches. The bike is further secured with a standard 3-bolt locking system, giving you peace of mind whether the box is installed on a balcony, terrace, driveway, or garden.

With compact dimensions of 86 × 129 × 203 cm, the Bike Garage 1 is ideal for urban living, where space is limited. Its sleek, modern design allows it to blend discreetly with outdoor spaces while providing the convenience of a personal mini-garage. Installation is simple on any stable surface using just three mounting points, making it versatile for both ground-level and elevated locations.

Choosing the Bike Garage 1 for Bikes means investing in a durable, aesthetic, and highly functional storage solution. It organizes your space, protects your bicycle, and solves the common problem of “where to park your bike.” Whether on a balcony, in a garden, or outside an office, this bike box keeps your bicycle safe, accessible, and neatly out of the way.
